Summary:

Full Stack Developer with 5 years of professional experience, Starting as a **Frontend Developer** and advancing to **Full Stack roles** at TCS, Centaari AI, and Verizon. Skilled in building high-performance web applications using **Javascript, React.js, Next.js, Node.js, and Express.js**.

Experienced in: Responsive UI Development, API Integration, API Endpoint development, Database Operation, Code Review, L1 Technical Interview.

Technical Skills:

Frontend: HTML5, CSS3, **JavaScript (ES6+)**, **TypeScript**, **React.js**, **Next.js**, Three.js, Tailwind CSS, SCSS, Material UI, PrimeReact, Component-driven architecture, SPA Development, React State Management (Redux, Zustand, Context API).

Backend: **Node.js**, **Express.js**, **Nest.js**, REST APIs, **Apollo GraphQL**, Prisma ORM, **MongoDB**, Cube.js, API Security & Rate Limiting.

Techniques & Principles: Responsive **UI Design**, Cross-Browser Compatibility, Authentication & Authorization (JWT/OAuth), **Server-Side Rendering (SSR)**, **Microservice Architecture**, Static Site Generation (SSG), Performance Optimization, **API Development**, End-to-End Development, Agile/Scrum.

Tools: GitHub, GitLab, Postman, Docker, Firebase, Supabase, Testing (Jest, React Testing Library).

Business Impact & Achievements: Delivered **zero production defects** across multiple releases, Performed **production code reviews** ensuring clean, maintainable code. Collaborated with **QA and cross-functional teams** to deliver high-quality releases. Conducted **20+ technical interviews**. **Sprint planning and backlog grooming** aligned with business priorities.

Key Projects:

[AirBrill.in](#) – Built responsive UI from scratch using **Next.js**, resulting in **top Google search ranking**.

[1HairStop.in](#) – Developed pixel-perfect UI and routing with **Next.js**, **Tailwind CSS**, **Sanity**.

[RotoPolymer.com](#) – Designed and implemented **animated scrolling UI** with **Three.js**, **GSAP**.

[FastTrackCabs.com](#) – Engineered **real-time cab booking app** from scratch using **Next.js**.

[Personal Portfolio](#) – Built an interactive 3D portfolio using **Next.js**, **Three.js**, **Blender**.

[SuperStarBriyani.com](#) – Delivered a lightweight static poster UI with **Next.js**.

Industry Experience:

Prodapt Solutions Pvt. Ltd. Chennai

June 2024-Present

Role: Full Stack Developer

Key Contribution & Impacts:

Architecting enterprise-grade full-stack applications using **Next.js**, **NestJS**, and **GraphQL**, enforcing strict type safety via TypeScript and Prisma ORM.

Optimized data fetching strategies using **TanStack Query** and server-side caching, significantly enhancing application responsiveness and scalability for high-traffic modules.

Leading the end-to-end SDLC from system design to production deployment; managing CI/CD workflows via **GitHub Actions** and containerizing services with **Docker** for bi-weekly AWS releases.

Mentoring junior developers and conducting **25+ technical interviews** to build a high-performing engineering team.

Collaborating in Agile sprints to deliver complex features with **REST API rate limiting** and robust security protocols.

Centaari AI - ARSR, Texas, USA (Remote)

April 2023-June 2024

Role: Frontend Developer

Key Contribution & Impacts:

Engineered a high-performance platform using **Next.js** and **TypeScript**, utilizing SSR and SSG to maximize SEO ranking and minimize Time-to-Interactive (TTI).

Integrated **OpenAI** and **Whisper APIs** to launch real-time voice chat and search capabilities, optimizing asynchronous handling to achieve **<200ms response latency**.

Partnered with backend teams to design secure authentication workflows (**JWT/OAuth**) and integrated Node.js/Express endpoints with MongoDB.

Established comprehensive testing suites using **Jest** and **Cypress**, ensuring 99% code reliability and adherence to clean code principles.

Tata Consultancy Services (TCS), Chennai

March 2021-April 2023

Role: Frontend Developer

Key Contribution & Impacts:

Modernized legacy interfaces into a component-based **React.js architecture**, successfully reducing overall page load time by **25%**.

Delivered critical business modules with **zero P1 defects** in production by implementing rigorous code reviews and pair programming protocols.

Streamlined frontend performance by optimizing bundle sizes and dependency management using npm/yarn.
